STONEDEKS
SYSTEM

**Elevate Your Deck
To A New Level**

**STONE DECK?
YES, YOU CAN!**

DECKS • STAIRS • ROOFTOPS

StoneDeks provides sturdy, all-weather subflooring which easily supports the weight of concrete, porcelain, or brick pavers, and natural stone, like travertine or granite. Incredibly quick and easy to install, the StoneDeks System is designed for new and remodeled structures.

STONE DECK? YES, YOU CAN!

Hardscapers use the StoneDeks System to reduce backfill, labor and settling issues.

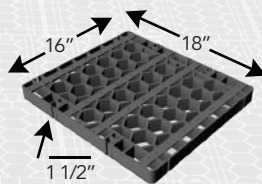

A BETTER WAY TO BUILD A DECK

Fastens to floor joist with standard deck screws

Cuts easily for custom applications

WELCOME TO THE STONEDEKS REVOLUTION

SilcaGrate™
Each SilcaGrate™ covers a 2sq. ft. area

"This weekend I performed my first power wash of the paver surface and the deck looks as good as new. During the intervening 6 years, the only routine maintenance performed on the deck was with a battery powered leaf blower. Try that on a conventional deck design."

Joseph B., Homeowner

STONEDEKS IS IDEAL FOR:

- Decks
- Patios
- Balconies
- Pool
- Porches
- Rooftops
- Stairways
- Gazebos
- Walkways
